

4G Case Study – Nick Cresswell

Nick Cresswell from Moneystone near Oakamoor in the Staffordshire Moorlands is currently unable to get access to Superfast Broadband through the fibre network.

Nick decided to contact Lawrence Hill from Notspot Broadband Limited based in Elkstones. Lawrence suggested a site visit to view the topography and investigate various options for the property – satellite, wireless etc. He suggested the 4G option and predicted speeds around 50-60mbps!

Nick said: “3 months on, it has proved to be a revelation, even managing to impress my four adult children, home for Christmas coping admirably with their downloading requirements. The installation was very straightforward taking less than an hour and I would recommend this option wholeheartedly, and the services of Notspot Broadband too.”
